

Type of Hip Fracture	Common Surgical Options	Positioning	Duration of surgery	EBL of surgery
Femoral neck fracture – undisplaced or valgus impacted	Cannulated screws	Fracture table supine	30 mins	25cc
	DHS	Fracture table supine	45min to 1.5h	100-300cc
Femoral neck fracture - displaced	Hemiarthroplasty	Lateral	1 – 1.5h	200-300cc
	Total hip arthroplasty (cemented or uncemented)	Lateral	1.5 – 2.5h	200 – 500cc
Basicervical	DHS	Fracture table supine	45min to 1.5h	100-300c
Intertrochanteric	TFN DHS	Fracture table supine (sometimes lateral)	40 min to 1.5h	100 – 300cc
Subtrochanteric	TFN	Fracture table supine (sometimes lateral)	1.5 – 2h	200 – 500cc
