

UPDATED 3-20-2020

BEST PRACTICES FOR MANAGEMENT OF SUSPECTED OR CONFIRMED COVID-19

How do I don PPE in the OR?

STEP 1

Perform hand hygiene with alcohol-based hand sanitizer.

Consider shoe covers.

STEP 2

Don yellow disposable isolation gown with thumbs through thumb hooks.

Tie waist ties behind the back.

STEP 3

Don fit-tested N95-respirator. Mold (do not pinch) the nosepiece to obtain a seal. Perform a seal check.

STEP 4

Don face shield or eye goggles. Personal eyeglasses are not adequate.

STEP 5

Don double gloves and pull over cuffs of gown. Remove outer glove after intubation.

ENSURE THAT YOU HAVE ON CLEAN SCRUBS, HEAD COVER, AND DEDICATED HOSPITAL FOOTWEAR
